TERMINAL OVERVIEW

- **Strategic location** within reach of serving customers in Central & Western VA
- **Frequent and streamlined** service between ocean and inland terminal connection
- **Three barges in rotation with a combined capacity of 500 FEU**, with the potential for six days a week service
- **Efficient inland terminal turn times** helping to maximize truck driver daily service schedules
- **Ease of accessing and terminating** empty containers at the inland terminal vs ocean terminal
- **Transloading and cross-docking services** available for container cargo transfers to/from railcars or domestic trucks
- **Covered and outside storage available** to serve customers utilizing transload services
- **Substantial CO2 emissions savings** versus all over-the-road inland movements
- **US Customs-designated port of entry** with full range of customer functions

\$6.1M INVESTMENT PROJECT

- **Gate:** Upgrading gate throughput to allow faster processing of trucks through the terminal (Est. Completion - Q1 2024)
- **Drop-Lot:** New secured area providing truckers ability to drop off after hours for next day processing (Est. Completion - Q1 2024)
- **Lighting:** Improved lighting to extend barge loading/unloading schedule for faster turn times (Est. Completion - Q1 2025)
