WHAT IF SHIPPING SUSTAINABLY WAS AS SIMPLE AS CHOOSING THE RIGHT PARTNER?

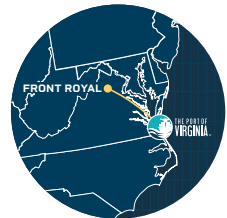

REDUCING EMISSIONS

- Directly fund lower-carbon transportation fuel solutions with verified and traceable emissions reduction certificates
- Make measureable progress towards sustainability goals, reduce Scope 3 emissions, and improve supply chain transparency.

VIRGINIA ADVANTAGE

- Service only offered through The Port of Virginia terminals Virginia International Gateway (VIG) and Norfolk International Terminals (NIT) to and from the Virginia Inland Port (VIP)
- VIP's strategic Mid-Atlantic location positions you reach to Virginia, Pennsylvania, West Virginia, Maryland, and DC markets faster

AMERICA'S MOST MODERN GATEWAY

At America's Most Modern Gateway, we are focused on delivering first-class operations, strategic advantages, and resilience for our customers and partners. Central to this commitment is our focus on sustainability, which is deeply embedded in both our long-term strategy and day-to-day operations. We are the first port to power terminals with 100% clean energy and is committed to Net-Zero by 2040.

"The goal is to provide cargo owners options. With more and more cargo owners emphasizing their interest in modern, cleaner supply chains, this effort goes right to that point."

STEPHEN EDWARDS
CEO & EXECUTIVE DIRECTOR, THE PORT OF VIRGINIA
