- Berth: 3,750 FT
- Channel Depth: 55 FT
- STS Capabilities: 14 Super Post Panamax Ship-to-Shore Cranes
- Refrigerated Cargoes: 1,200+ reefer plugs
- Rail Service: Norfolk Southern and CSX

WORLD-CLASS TERMINAL OPERATIONS

- **Modern container terminal.** The integration of modern stacking cranes powers industry-leading efficiency and optimizes the container yard.
- **Unrestricted ULCV traffic.** The Norfolk Harbor is deepest, widest channel on the US East Coast with a water depth of 55 feet and zero overhead air draft restrictions.
- **Direct service to Norfolk Southern and CSX railroads.** The terminal offers direct on-dock rail access to both of the US East Coast's Class 1 railroads, and offers the most expansive inland reach of any port on the US East Coast.
- **PROPASS Truck Reservation System.** The port's integrated reservation system for trucking partners supports 35-minute turn times at NIT.
- **Direct highway access.** Located adjacent to State Route 164 (a 4-lane divided highway), VIG offers easy access to the I-64 interstate systems, supporting the flow of cargo to key distribution centers in Virginia and beyond.
- **Award-winning infrastructure enhancements.** The terminal recently underwent a three-year, \$312 million investment, completed in 2019, that reimagined and re-engineered the terminal, doubling VIG's capacity. The project earned Lloyd's List Excellence in Port Management and Infrastructure Award in 2019.
